☒ eShare Expressions 4.0 Features

The "inside scoop" on Expressions 4.0! Good things come to those who wait. (and thanks for your patience!) Soon, you will see how Expressions keeps getting better! 4.0 is packed with new features and exciting new options including:

**IMPROVED SERVER EFFICIENCY**

- More efficient memory management for maximum server performance.
- Multi-processor support for improved server performance.
- Reduction in duplicative code for improved server efficiency.

**IMPROVED FORUMS**

- Total thread expansion.
- Icon denotes "new" messages since "x" number of days.
- Subject boards may be password protected.
- A "show all messages" option enables users to view all posts -- or to view posts in threaded format.
- Users may search for posts by date, subject, author, and content.
- Users may sort messages by author, date, thread, etc.
- User has option to omit "+" or "-" open and close subject board feature.

**IMPROVED CHAT FEATURES**

- Filth filter prohibits offensive user-created room names.
- Administrators may toggle on/off ability to create a list of buddies.
- Ad server tags can be placed in the HTML client allowing integration with multiple ad servers.
- Rooms may be modified on the fly.

**IMPROVED CHAT MODERATOR FEATURES**

- "Inter-row" feature can be disabled. This takes moderator and guest out from "backstage" and puts them back into one room with the crowd.
- Moderated room can be password protected.

**CUSTOM TEMPLATES**

- Design overall layout of interface using ready-to-use templates, or modify them to fit your needs.
- Templates available for Forums, HTML client, Java-light client, All Users (all clients), and Profiles (all clients and forums).

**USER-FRIENDLY LOGIN AND REGISTRATION PAGES**

- Improved layout and text.
- Provides helpful account name suggestions if name is already in use.
- User may change passwords.

**NEW SCHEDULING FEATURE**

- Chat rooms and Bulletin Board forums can be "opened" and "closed" on a scheduled basis.

#### **ENHANCED ACCESS CONTROL**

- Access Control Lists (ACL) flexibility gives administrators the ability to specify permissions to rooms and boards on a person by person, group by group basis.

#### **NATIONALIZATION FEATURE**

- Previously "hard-coded" server messages (Error messages, login confirmation messages, timeout messages, etc.) can now be changed into any words or language desired.
- Available for Java, Java-Light, HTML, Web-Tours and BBS.

#### **IMPROVED COMMANDSCRIPT**

- Command script, used for page parsing, has been reengineered to produce more efficient results.

#### **ODBC FORUM SUPPORT (NT Only)**

- Ability to store all forum data in ODBC-compliant databases - SQL Server.

#### **NEW ADMINISTRATOR STATISTICS FUNCTION**

- Administrator can view statistics on Forum and Chat activity such as average users, average number of posts, average number of minutes, etc.

#### **IMPROVED DATABASE API**

- Database APIs updated to include current functionality.
- Updated documentation simplifies application development for the end user.

#### **INTELLIGENT ADMIN SERVER (NT Only)**

- Admin server monitors Expressions services and restarts them if necessary.
- Automatic notification messages sent to Administrator via SMTP.
